Helping Small Businesses Grow Using The Internet

Easy Local SEO.com: Why This is a Great Program for Your Small Business

Why do you need the internet for your business?

Did you know that a large percentage of Internet users who make purchases online prefer *search engines* to conventional Yellow Pages?

80% of Americans are now online. Nearly 70% of them are using search engines to look for information online. If they can type what they're looking for into a search engine and find what they need then they don't need to go through the 100 pages of ads in the Yellow Pages.

And many people don't anymore. But that's a good thing if you're taking advantage of it!

Think about it: in the Yellow Pages, your ad-site is right there with all of your local competitors. But using search engines, you can differentiate yourself from everyone else. Given that your site is optimized, when the ideal client is looking for what you do, they find you, not your competitors.

That's very powerful for your business!

Here's what EasyLocalSEO will do for you and your business...

- **Free website analysis.** Our team will personally go over your website and provide you with a detailed analysis. This will tell you where you're at, and where you need to be to start generating great results from search engine marketing.

You are not charged a penny for that service. Your analysis will be prepared and sent to you via registered email within a week (and possibly 48 hours).

Once you sign up for the program, here is what is provided with the outstanding package each month:

- One **Article written/submitted** to directories
- One **Press Release written/submitted** to directories
- One **Marketing Audio created & added** to your branded podcasting site
- One **Marketing Video created & submitted** to video directories including YouTube, Google Video, and many others!

Article, Press Release, Video & Audio submitted across the internet!!

And here's the best part...this is done for you each and every month, and you don't have to lift a finger! Our specialized team handles it all for one relatively low price!

How much are you paying now?!

If you're now involved with a pay-per-click program you're paying for every visitor to your site even if they have no intention of doing business with you. And worse yet, once you stop paying, your business is off the net in 15 minutes, **with no evidence that you were ever there.**

So go here now for your free website analysis and find out what EasyLocalSEO can do for you.
